

H-SCAN Test Results for Elliott C. Small, Jr. in 1999

TEST	SCORE	PERCENTILE
1. Auditory reaction time, sec	.131	87
2. Highest audible pitch, kHz	12.6	79
3. Vibrotactile sensitivity, dB	34	47
4. Visual reaction time, sec	.204	60
5. Muscle movement time, sec	.091	92
6. Lung: forced vital capacity, liters	6.1	90
7. Lung: forced expiratory volume, 1 sec-liters	4.85	88
8. Visual react time with decision, sec	.251	50
9. Muscle movement time with decision, sec	0.53	97
10. Memory, length of sequence		
This is the longest sequence tested, but for some reason the results return 96 instead of 99 when you get a perfect score.		
	16	96
11. Alternate button tapping, sec	12.8	98
12. Visual accommodation, diopters	7.9	96

Chronological Age: **51**

Test Age based on combination of scores: **33**

This H-Scan Test was performed at Anti-Ageing South Africa in Johannesburg, South Africa, by Dr. Christiaan Geldenhuys.
