US Vasc Dplx Ven Low Ext Bilat

Patient: MAXINE SIMON **DOB:** Oct 26, 1955

PROCEDURE: Bilateral lower extremity venous duplex

Comparison: None.

HISTORY: Chest pain. Right leg pain and swelling.

DATE: 2/17/2014

FINDINGS: In addition to grayscale images, color Doppler and spectral analysis were used to interpret this study. Bilateral common femoral, femoral, popliteal, and calf veins show normal compressibility and augmentation. Color Doppler is normal.

IMPRESSION:

1. No evidence of lower extremity venous thrombus.
